

Mohammed Juber Ahmed

Frontend Developer

Birmingham, UK · mohammed.juber.ahmed@gmail.com · juberahmed.dev · github.com/Juber-Ahmed98 · linkedin.com/in/mohammed-juber-ahmed

PROFESSIONAL SUMMARY

Frontend-focused web developer with 3+ years of commercial experience building responsive, user-first web experiences in a large-scale B2B e-commerce environment. Proficient in HTML, CSS (SASS), and JavaScript, with hands-on experience in A/B testing, personalisation, and CMS platforms. Currently expanding into full-stack and AI development through a stack of self-built, shipped side projects. Comfortable working across design, marketing, and product teams in Agile workflows.

TECHNICAL SKILLS

Frontend: HTML, CSS (SASS), JavaScript, Responsive Web Design

Backend / Data: Python, C#, SQL, NoSQL

Testing & Optimisation: A/B Testing, Functional Testing, Monetate Personalisation

Platforms & Tools: Bloomreach, YEXT, GitHub, Jira, Asana, VS Code

PROFESSIONAL EXPERIENCE

Digital Developer | Wolseley

August 2024 – Present

- Build and maintain responsive, accessible web pages for a high-traffic B2B e-commerce platform serving trade customers across the UK.
- Run A/B tests and personalisation campaigns via Monetate to improve on-site engagement and conversion.
- Collaborate daily with designers, marketers, and product managers within Agile sprints — attending standups and weekly content planning sessions.
- Own version control workflows using GitHub, ensuring clean code collaboration and peer review across the frontend team.
- Manage project tasks and cross-team delivery tracking in Jira and Asana.

Apprentice Merchandiser & Developer | Wolseley

December 2022 – August 2024

- Developed responsive web pages and promotional banners using HTML, CSS, and JavaScript as part of the merchandising team.
- Ensured site quality through comprehensive functional testing, working closely with senior developers and UI/UX designers to resolve issues.
- Managed product promotions, pricing updates, and content across CMS platforms including Bloomreach and YEXT.
- Completed a Level 3 Software Development Technician apprenticeship concurrently, applying classroom skills directly to live projects.

Warehouse Associate | Amazon

October 2021 – December 2022

- Processed orders and managed inventory in a fast-paced fulfilment environment; recognised for accuracy and reliability.

SELECTED PROJECTS

Jembatan — Android IME keyboard with AI translation & transcription + Cloudflare Worker backend

- Shipped end-to-end: an IME keyboard doing text-to-text and voice-to-text AI translation and transcription (GPT + Whisper), served by a `/api/v1/translate` Cloudflare Worker backend — plus onboarding UX, branding, roadmap, and

privacy policy. Full-stack + mobile.

- Live: jembatan.juberahmed.dev · Code: github.com/Juber-Ahmed98/Jembatan-app

mission_to_abs — React fitness app (Framer Motion, Recharts, Zustand)

- Frontend craft showcase: fluid animation, interactive data-visualisation, and clean client-side state management.

ecommerce_store — React + Tailwind + React Router storefront

- Personal build reinforcing commercial e-commerce experience: product catalogue, routing, and responsive layout.

EDUCATION

Level 3 Software Development Technician | QA Apprenticeships

January 2023 – July 2024

- Core modules: HTML/CSS/JavaScript, OOP with Java and C#, Python, SQL/NoSQL databases, Git and version control, cloud fundamentals.

BSc Radiotherapy (2 years completed) | Birmingham City University

September 2016 – 2018

- Completed two years of a science degree before redirecting into the technology sector.

A Levels | Waverley Sixth Form

2014 – 2016

- Mathematics (B), Biology (B), Chemistry (C).

GCSEs | Waverley Secondary School

2009 – 2014

- 13 GCSEs, grades A–C.
